

J.H. Gunderson of Portland Oregon sent the following testimony to the *Voice of Healing Magazine*. They published it in July 1948.

I had arthritis which had been coming on for several months. I had been prayed for several times. So I went to the doctor and he said I had a bad case, and right in the joints. He gave me 36 shots in my arms, but there was little relief. I had it in my arms, feet, and every joint. I was in terrible shape. I could not raise my hands higher than my mouth and I had to walk the floor for a long time before I could dress. Then I told my husband I was going to stop going to the doctor and instead would go to the prayer meeting every morning. Still I had no relief.

I managed to get Brother Branham's address, so I sent a handkerchief to be anointed and prayed over. On December 29th, in the morning I got up and all pain had left. I dressed and went to work cleaning up the kitchen . I washed the dishes and the woodwork, feeling fine.

Three days later I got that handkerchief from Brother Branham , and looked at the postmark and discovered that morning he prayed and I was healed. I am still completely healed.

Minor typographical and grammatical changes made.
