

Paralyzed Girl Healed and Walking

I would like to mention one case of healing, that of a young woman in the Ottawa Hospital who was paralyzed from the waist downwards; she was bedridden and had been afflicted, I was told, for five years. Both her feet were also clubbed. The superintendent of the hospital was with me as I placed my hands on her in prayer. The patient said afterwards that while I prayed with her she was conscious of a glow of new life in her limbs. And that afternoon the right foot came straight, and, as she saw this happen, her first words were: "I will give my life to God." In two days she was able to walk.
